DETAILED ACTION

1. This office action is in response to application filed on April 04, 2000. Claims 1-51 are considered for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-26, interpreter, classified in class 717, subclass 139.

II. Claims 27-35, remote data accessing, classified in class 709, subclass 217.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility such as means or steps for translating each instruction of a program into machine executable form and executing the instructions, one instructions at a time. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Ananian on March 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
